

TREASURE

RANDOM TREASURE DETERMINATION

I. MAP OR MAGIC DETERMINATION

01-10 = Map Table (II.)

11-00 = Magic Items Table (III.)

If the treasure in a monster's lair indicates that maps or magic are there, you will often have to determine which are present by random number generation with percentile dice. This is simple and the table shows which tables to use to determine the result. This system can be used for monsters you place on the outdoor map as well as for monsters randomly encountered by a party exploring in the wilderness. In any event, you will have to make a number of additional dice rolls to find exactly what is within the treasure trove.

II. MAP TABLE

Dice	Result
01-05	False map
06-70	Map to monetary treasure
71-90	Map to magic treasure
91-00	Map to a combined hoard

If a map is indicated, you must generate a number between 01 and 00 to discover what the map leads to. However, the contents of the map itself are a problem, for how can it be possible to direct each DM properly considering the infinite number of possibilities under which the map will be located? The answer is that this writer can only suggest. A map should **never** list its treasure, only show its location.

When a map is purposely placed by the DM it is obviously incumbent upon him or her to satisfy both its requirements — to what it leads and where it leads. Randomly discovered maps are not an overwhelming problem. In the dungeon they can show a route down, up or (if the lair is at an edge of the level map) off into an area you have not yet drawn. Use the **RANDOM DUNGEON GENERATION** tables to set out a course which their map will "show". There is no reason why the treasure cannot be guarded, or why monsters cannot be encountered along the way, as long as the whole fits reasonably together, i.e. the map owner placed the guards or was unable to get the treasure because of these monsters. Generally, the whole route can be quite long or only a few hundred feet. If the treasure is particularly rich you might wish to have it hidden leagues away in another lost dungeon, along the course of a long underground river, or something similar. The direction of your campaign is strictly your own province.

Maps found outdoors in a monster's lair can lead into an underground labyrinth, a few miles in the wilderness to some hidey-hole, lair, ruins, or even in a town. Direction is easily determined by a quick roll of d8, basing the compass on 1 being north (or whatever) and simply counting round (2 is northeast, 3 is east, etc.). The table below may be used as a guide if you wish:

01-20	labyrinth of caves found in the lair
21-60*	outdoors, 5-8 miles distant
61-90*	outdoors, 10-40 miles distant
91-00*	outdoors, 50-500 miles distant

* Treasure shown on the map is:

01-10	buried and unguarded
11-20	hidden in water
21-70	guarded in a lair
71-80	somewhere in a ruins
81-90	in a burial crypt
91-00	secreted in a town

Elaborate as you see fit. For containment, concealment and trapping, refer to the tables given with the **RANDOM DUNGEON GENERATION**.

Note that relatively low-value treasures will not be as well guarded as those of great value.

II.A. MONETARY TREASURE

Dice	Result
1-2	20,000-80,000 copper pieces (2d4), 20,000-50,000 silver pieces (d4 + 1)
3-5	5,000-30,000 electrum pieces (5d6)
6-10	3,000-18,000 gold pieces (3d6)
11-12	500-2,000 platinum pieces (5d4)
13-15	10-100 gems (d10 × 10)
16-17	5-50 pieces of jewelry (5d10)*
18	Roll twice, discounting rolls above 17
19	Roll thrice, discounting rolls above 17
20	Each monetary item above

* Specific types of jewelry can be determined on the **Jewelry and Items Typically Bejewelled Table** (part of **Appendix I, DUNGEON DRESSING**) if desired.

This table shows the parameters for each sort of goods to be found in a treasure of this sort. Random number generation with d20 discovers which sorts of goods are in the trove. You will observe that the table is weighted towards large quantities of coins which will require a train to remove — or must be left entirely if foreplanning is not observed.

(As with any treasure not taken immediately, you must set a percentage chance for it to be stolen away if it is abandoned by the discoverers. Their actions and precautions will serve as guidelines. If a monster guarded the treasure, the likelihood of it being taken elsewhere could increase greatly.)

Base value of gems and jewelry can be determined when the treasure is actually divided and disposed of.

II.B. MAGIC TREASURE

Dice	Result
1-5	Any item rolled on Magic Item Table, plus 4 Potions
6-8	Any 2 items rolled on Magic Item Table
9-12	1 Sword, 1 Armor or Shield, 1 Miscellaneous Weapon
13-14	Any 3 items, no Sword or Potions
15-18	Any 6 Potions and any 6 Scrolls
19	Any 4 items, 1 is a Ring, 1 is a Rod
20	Any 5 items, 1 is a Rod, 1 is Miscellaneous Magic

This random determination table needs no explanation. Because of its weighting, and the weighting of the **MAGIC ITEMS** table, most treasures will have magic potions, scrolls, armor and weapons. This is carefully planned so as to prevent imbalance in the game. Keep potent magic items rare. (Increase scarcity by destroying or stealing what is found!)

II.C. COMBINED HOARD

Dice	Result*
01-20	1-2 Monetary Treasure and 1-5 Magic Treasure
21-40	6-10 Monetary Treasure and 1-5 Magic Treasure
41-55	3-5 & 6-10 Monetary Treasure and 1-5 & 15-18 Magic Treasure
56-65	1-2, 3-5 & 6-10 Monetary Treasure and 9-12 & 13-14 Magic Treasure
66-75	6-10 & 11-12 Monetary Treasure and 6-8 & 15-18 Magic Treasure
76-80	3-5, 6-10, 11-12 & 16-17 Monetary Treasure and 1-5 & 9-12 Magic Treasure
81-85	20 Monetary Treasure and map to 1-5 Magic Treasure
86-90	20 Monetary Treasure and map to 19 Magic Treasure
91-96	Map to 1-2 & 3-5 Monetary Treasure, 20 Magic Treasure on hand
97-00	Map to 11-12 & 13-15 Monetary Treasure plus 15-18 Magic Treasure, 20 Magic Treasure on hand

* Key the results to the proper listings from the prior two tables.

These are the real finds, which can satisfy even the most avaricious dwarf's greed. Note that when it says "1-2 Monetary Treasure", for instance, it means the treasure indicated by a die result of 1 or 2 on the **MONETARY TREASURE** sub-table. Combined hoards should be hidden, trapped and guarded! They should be located in distant places too!

III. MAGIC ITEMS

Dice	Results
01-20	Potions (A.)
21-35	Scrolls (B.)
36-40	Rings (C.)
41-45	Rods, Staves & Wands (D.)
46-48	Miscellaneous Magic (E.1.)
49-51	Miscellaneous Magic (E.2.)
52-54	Miscellaneous Magic (E.3.)
55-57	Miscellaneous Magic (E.4.)
58-60	Miscellaneous Magic (E.5.)
61-75	Armor & Shields (F.)
76-86	Swords (G.)
87-00	Miscellaneous Weapons (H.)

As mentioned previously, the MAGIC ITEMS table is weighted towards results which balance the game. Potions, scrolls, armor and arms are plentiful. Rings, rods and miscellaneous items of magic represent only a 25% occurrence on the table. This is so done in order to keep magic-users from totally dominating play. They are sufficiently powerful characters without adding piles of supplementary goodies. What they gain from the table will typically be used up and discarded.

When determination of a magic item is needed simply roll percentile dice and consult table III. Complete explanations of each category follow, but as many items duplicate or closely resemble the effects of various magic spells, you will need a copy of **ADVANCED DUNGEONS & DRAGONS, PLAYER'S HANDBOOK** for reference.

The suggested experience point (x.p.) values are for characters who keep the items. Gold piece sale values are the usual sums which characters will be paid for magic items, and if so sold, the x.p. award should be based on the selling price of the items, not the x.p. value. Also remember that a character is assumed to retain an item, thus getting the low x.p. value for it, if he or she sells it to another player character. (See **EXPERIENCE**.)

Note: Many magical items are of an expendable nature, where their power is depleted with each use and eventually used up. The Dungeon Master can use his discretion in setting such limitations on other particular items, if he wishes.

III.A. POTIONS

Dice	Result	Experience Point Value	G.P. Sale Value
01-03	Animal Control*	250	400
04-06	Clairaudience	250	400

91-93	Sweet Water	200	250
94-96	Treasure Finding	600	2,000
97	Undead Control*	700	2,500
98-00	Water Breathing	400	900

* Effectiveness on type of creature controlled must be determined by die roll; consult item explanation.

** The Dungeon Master must mislead the possessor of the potion so as to convince him that it is not harmful. (See the appropriate item description for particulars.)

(F) = Fighters only may use

III.B. SCROLLS*

Dice	Result	Spell Level Range
01-10	1 spell	1-4
11-16	1 spell	1-6
17-19	1 spell	2-9 (d8 + 1) or 2-7* (d6 + 1)
20-24	2 spells	1-4
25-27	2 spells	1-8 or 1-6*
28-32	3 spells	1-4
33-35	3 spells	2-9 or 2-7*
36-39	4 spells	1-6
40-42	4 spells	1-8 or 1-6*
43-46	5 spells	1-6
47-49	5 spells	1-8 or 1-6*
50-52	6 spells	1-6
53-54	6 spells	3-8 (d6 + 2) or 3-6* (d4 + 2)
55-57	7 spells	1-8
58-59	7 spells	2-9
60	7 spells	4-9 (d6 + 3) or 4-7* (d4 + 3)
61-62	Protection — Demons	(2,500 x.p.)
63-64	Protection — Devils	(2,500 x.p.)
65-70	Protection — Elementals	(1,500 x.p.)
71-76	Protection — Lycanthropes	(1,000 x.p.)
77-82	Protection — Magic	(1,500 x.p.)
83-87	Protection — Petrification	(2,000 x.p.)
88-92	Protection — Possession	(2,000 x.p.)
93-97	Protection — Undead	(1,500 x.p.)
98-00	Curse**	

* 30% of all scrolls are of clerical nature (dice 71-00), and 25% of all clerical scrolls are druidical. 10% of all magic-user scrolls are illusionist. This applies only to scrolls 01-60 above. Asterisked numbers indicate clerical spell levels.

** It is incumbent upon the Dungeon Master to do his utmost to convince players that a cursed scroll should be read. This is to be accomplished through duplicity, coercion and threat, etc. — i.e., any scroll not read has a chance of fading in normal air, but this can be noted by the archaic wording if read in the still dungeon atmosphere. A curse takes effect immediately; suggested curses are:

- 01-25 — Reader polymorphed to monster of equal level which attacks any creatures nearby
- 26-30 — Reader turned to liquid and drains away
- 31-40 — Reader and all within 20' radius transported 200 to 1,200 miles in a random direction
- 41-50 — Reader and all in 20' radius transported to another planet, plane or continuum
- 51-75 — Disease fatal to reader in 2-8 turns unless cured
- 76-90 — Explosive runes
- 91-99 — Magic item nearby is "de-magicked"
- 00 — Randomly rolled spell affects reader at 12th level of magic-use

Experience Points (x.p.) Value:

Awarded only to characters who can use the spell(s); the award should be 100 x.p. per spell level. Protection scrolls are noted as to x.p. value on the table itself.

Gold Piece (g.p.) Sale Value:

Any scroll can be sold in the "open market" for three times its x.p. value. Protection scrolls sell for five times x.p. value.

III.C. RINGS

Dice	Result	Experience Point Value	G.P. Sale Value

EXPLANATIONS AND DESCRIPTIONS OF MAGIC ITEMS

POTIONS (III.A.)

Potions are typically found in ceramic, crystal, glass, or metal flasks in enough quantity to provide one person with one complete dose so as to be able to achieve the effects which are given hereafter for each type of potion. Potion containers can be other than as described at your option. As a general rule they should bear no identifying marks, so that the players must sample from each container in order to determine the nature of the liquid. However, even a small taste should suffice to identify a potion in some way — even if just a slight urge. As Dungeon Master you should add a few different sorts of potions, both helpful and harmful, of such nature as to cause difficulties in identification. In addition, the same type of potion, when derived from different sources, might smell, taste, and look differently.

- Unless otherwise stated, the effects of a potion will last for 4 complete turns plus 1-4 additional turns (d4). If half of a potion is quaffed, the effects will last one-half as long in some cases. Potions take effect 2-5 segments after they are imbibed.

While potions can be compounded by magic-user/chemist teams at a relatively low cost, they must have an actual potion to obtain the formula for each type. Furthermore, the ingredients are always rare and/or hard to come by. This aspect of potions, as well as the formulation of new ones by players, is detailed in the appropriate subsection of the **MAGICAL RESEARCH** rules.

Animal Control: This potion enables the imbiber to empathize with and control the emotions of animals of 1 type, i.e. cats, dogs, horses, etc. The number of animals so controlled depends upon size: 5-20 animals of the size of giant rats, 3-12 animals of about man-size, or 1-4 animals of about ½ ton or more in weight. The sort of animal which can be controlled depends upon the particular potion as indicated by die roll (d20):

1-4	mammal/marsupial
5-8	avian
9-12	reptile/amphibian
13-15	fish
16-17	mammal/marsupial/avian
18-19	reptile/amphibian/fish
20	all of the above

Animals with intelligence of 5 (low intelligence) or better are entitled to a saving throw versus magic. Control is limited to emotions or drives unless some form of communication is possible. Note that many monsters cannot be controlled by the use of this potion, nor can humans, demi-humans, or humanoids. (Cf. *Ring of Mammal Control*.)

Clairaudience: This potion empowers the creature drinking it to hear as the third level magic-user spell of the same name (q.v.). It can be used, however, to *clairaudit* unknown areas within 3". Its effects last for 2 turns only.

Clairvoyance: This potion empowers the individual to see as the third level magic-user spell, *clairvoyance* (q.v.). It differs from the spell in that unknown areas up to 3" distant can be seen. Its effects last for 1 turn only.

Climbing: Imbibing this potion enables the individual to climb as a thief, up or down vertical surfaces, with only a base 1% chance of slipping and falling. (Check at the halfway point, d%, 01 equals a fall.) A climbing potion is effective for 1 turn plus 5 to 20 rounds. For every 1,000 g.p. weight equivalent carried by the character, there is an additional 1% added to chance of slipping. If the climber wears armor, there are the following additions to the slipping/falling chance:

studded leather	1%
ring mail	2%
scale mail	4%
chainmail	7%
banded or splinted armor	8%
plate mail	10%
magic armor, any type	1%

Delusion: This potion affects the mind of the character so that he or she believes the liquid is some other potion (*healing*, for example, is a good choice — damage is "restored" by drinking it, and only death or rest after an adventure will reveal that the potion only caused the imbiber to believe that he or she was aided). If several individuals taste this potion, it is still 90% probable that they will all agree it is the same potion (or whatever type the DM announces or hints at).

Diminution: When this potion is quaffed, the individual, and all he or she carries and wears, will diminish in size to as small as 5% of normal size. If half of the contents are swallowed, the person shrinks to 50% of normal size. The effects of this potion last for 6 turns plus 2-5 turns (d4 + 1).

Dragon Control: This potion enables the individual drinking it to cast what is in effect a *charm monster* spell upon any dragon with 6". The dragon is entitled to a saving throw versus magic, but it is made at -2 on the die. There are various sorts of *dragon control* potions, as shown below (d20):

1-2	white dragon control
3-4	black dragon control
5-7	green dragon control
8-9	blue dragon control
10	red dragon control
11-12	brass dragon control
13-14	copper dragon control
15	bronze dragon control
16	silver dragon control
17	gold dragon control
18-19	evil dragon control*
20	good dragon control**

* Black, blue, green, red, white.

** Brass, bronze, copper, gold, silver.

Control lasts for from 5-20 (5d4) rounds.

ESP: The ESP potion bestows an ability which is the same as the second level magic-user spell of the same name (q.v.), except that its effects last for 5-40 (5d8) rounds, i.e. 5 to 40 minutes.
